Guide to Entrance for Master Course Students

Chiba University Graduate School of Medical and Pharmaceutical Sciences

1. Admission quotas

Field of study	Admission quota
General Pharmaceutical Sciences	A few

2. Eligibility for application

- (1) A person who has graduated from or who is scheduled to graduate by September 2017 from a university (refers to a university as provided for in Article 83 of the School Education Law (Law No. 26, 1947); the same shall apply hereinafter).
- (2) A person who according to the stipulations of Article 104.4 of the School Education Law has received an undergraduate degree or who is scheduled to receive an undergraduate degree by September 2017.
- (3) A person who has completed or who is scheduled to complete by September 2017 a 16-year course of school education in a foreign country.
- (4) A person who has completed or who is scheduled to complete by September 2017 a 16-year course of school education in a foreign country through study in Japan of subjects by means of correspondence education provided by a school in the foreign country in question.
- (5) A person who has completed or who is scheduled to complete by September 2017 in Japan a course of study at an education institution that has a status under the school educational system of a foreign country and holds university degree courses of the foreign country in question (only where a person who has completed such a course has completed a 16-year course of school education of the foreign country in question) and that has been separately designated by the Minister of Education, Culture, Sports, Science and Technology.
- (6) Those who have completed an academic program of either a foreign university or a foreign Educational institution (limited to which its comprehensive progress of education and research have been evaluated by an external personnel certified by its government or its related agency, or an institution designated as equivalent by the Minister of MEXT) whose term of study is at least 3 years or more (including completion of the said program in our country earning credits from its institution's correspondence course or from an educational facility established in Japan under the school education system of the said foreign country designated in the preceding issue), and have earned or expect to earn by March 2017, a bachelor's degree or an equivalent degree.
- (7) A person who has completed a course of specialist study at a special technical school (only where the school in question has a term of study of more than four years and fulfils the criteria as stipulated by the Minister of Education, Culture, Sports, Science and Technology) that has been separately designated by the Minister of Education, Culture, Sports, Science and Technology and has completed this course after a date stipulated by the said minister.

- (8) A person designated by the Minister of Education, Culture, Sports, Science and Technology (Notification No. 5 of the Ministry of Education, 1953).
- (9) A person who has entered the graduate school accordingly to the stipulations of Article 102.2 of the School Education Law, and who is deemed to have appropriate academic ability to receive post-graduate education at this graduate school.
- (10) A person corresponding to any of the following items who, by September 2017, is or will be deemed by the Graduate School to have obtained the prescribed credits with outstanding results:
- (a) A person who has studied at a university for three years or more.
 - (b) A person who has completed a 15-year course of school education in a foreign country.
 - (c) A person who has completed a 15-year course of school education involving the study in Japan of subjects by means of correspondence education provided by a school in the foreign country in question.
 - (d) A person who has completed a course of study at an educational institution in Japan that has a status under the school educational system of a foreign country and holds university degrees courses of the foreign country in question (restricted to the case where a person is deemed to have completed a 15-year course of school education for the foreign country in question) and that has been separately designated by the Minister of Education, Culture, Sports, Science and Technology.
- (11) A person who, as a consequence of an individual university entrance qualifications screening process, is deemed by the College to possess academic ability of the same or a superior level to a person who has graduated from university, and who is at least 22 years of age or will be 22 years of age by September 2017.

Note: Applicants who are eligible under the categories described above in (9), (10) or (11) should refer to “5. Screening and approval of eligibility for application” on page 6.

The announcements will be posted at the above locations for three days after announcement, in addition to which successful applicants will each be notified individually.

8. Precautions

(1) Details of the entrance examination will be displayed on the notice board in the Faculty of Pharmaceutical Sciences at 10:00 a.m. on Thursday, August 17, 2017.

(2) Applications may not be accepted unless all the documentation required for application is in place.

- (3) Changes may not be made in documentation following application procedures and examination fees will not be returned.
- (4) Applicants should if possible avoid coming to the university by car.
- (5) An applicant who makes a false declaration on the application documentation, etc. may have his authorization to join the university cancelled even after he or she has begun his or her studies.
- (6) Results will not be communicated by means of telegram, telephone, etc.
- (7) Personal information obtained in the process of screening of applicants will be used for the screening of applicants as well as for work related to surveys and research in connection with control and management work, study guidance work, and methods for the selection of applicants, etc.

9. Admission procedures

- (1) Period and place of admissions procedures

* Field of General Pharmaceutical Sciences

Deadline: Friday, September 22, 2017

Place office: Faculty of Pharmaceutical Sciences, Chiba University

- (2) Payments required upon admission:

(a) Admission fee: ¥282,000

(b) Tuition fee (first semester): ¥267,900 (Total ¥535,800 / year)

(If the tuition fees, etc. are revised, the new fees will be applied from the time of revision.)
Students may if they so wish pay tuition fees for the first semester and the second semester together.

Note: There is a system that allows for exemption from payment of the admission fee and tuition fees. For details, please contact the organization for student support.
Tel:+81-43-290-2178

(c) Student Health Mutual Aid Society costs: Membership charge of ¥4,000 (valid for two years), to be paid at Japan Post Bank. (The purpose of this system is to contribute to maintenance of health by means of relief based on mutual aid when a student experiences illness or injury.)

Note: For details, please contact the organization for student recruitment.
Tel: +81-43-290-2220

(d) Student Education and Research Accident and Damage Insurance premium: Membership charge of ¥2,430 (valid for two years), to be paid at Japan Post Bank. (Insurance will be provided for injuries incurred as a consequence of unforeseen accidents, etc. occurring during

formal tuition, extracurricular activities, school ceremonies or while traveling to or from university.)

Note: For details, please contact the organization for student recruitment.
Tel: +81-43-290-2162

Notes:

1. It is our general policy to not return admission fee once received for any reason.
2. Successful foreign applicants on scholarships provided by the Japanese government (Ministry of Education, Culture, Sports, Science and Technology) are not required to pay the admission and tuition fees.

(3) Scholarship system

A system of scholarships for graduate students is offered by the Japan Student Services Organization (JASSO) (formerly the Japan Scholarship Foundation). The screening process is based on recommendation to JASSO, following screening of an applicant's academic results, capacity to undertake research, financial situation at home, etc.

- (4) Details of the other admission procedures, including documents to be submitted, will be forwarded directly to successful applicants separately.
