

## JISEDAI Symposium Lectureship Award 2020

### 1. Purpose

The JISEDAI Symposium Lectureship Award encourages young researchers who are expected to play an active role in the future while developing creative research in the field of organic chemistry. This award provides opportunities for young researchers to present one's chemistry through a lecture tour through Japan and overseas.

### 2. Award Recipients

As of April 1, 2020, young researchers (doctoral, or a doctoral equivalent are also welcomed) under the age of 36 (born after April 2, 1984) and who have been members of the Pharmaceutical Society of Japan for over a year at the time of application are eligible. However, students who are eligible to receive the Student Lecture Award are not eligible for this award. If you took a leave of research due to a life event (childbirth/childcare/elderly care), the leave period will be extended from the upper age limit.

This award is given to researchers who make excellent English lectures at the 18th Organic Chemistry –the Next Generation–. In principle, within the award year, the winners of this award will deliver lectures at overseas and/or domestic universities and research institutes (travel expenses). Additionally, a written report following the lecture tours is expected. The report will be posted on “Farumashia” and “The Pharmaceutical Society Japan Division of Organic Website”.

### 3. Number of Awards

1 (in principle)

### 4. Application Documents

Please fill out the required application form and upload the PDF file from the designated link on the web page of “Organic Chemistry –the Next Generation–”.

#### Filling Documents

- Curriculum Vitae
- Lecture Summary

- Achievement List

### **Deadline for Application**

January 31th, 2020

After receiving the documents, we will inform you of the receipt by e-mail. Please contact us if you do not receive the notification from us within 3 days. This document will be used only for the selection of the JISEDAI Symposium Lectureship Award and subsequent lecture tours, and will not be used for any other purpose.

### **5. Examination Method**

Preliminary screening is conducted based on the submitted documents. Applicants who have passed the screening process (scheduled to be notified in late February) is required to register and to prepare an English abstract for the 18th Organic Chemistry –the Next Generation–. The final review will be held at the lecture of this symposium (Lecture in English: presentation 15 minutes, question 10 minutes). There is no problem if the contents of the presentation overlap with the topic to be awarded in one of the following awards: The Pharmaceutical Society of Japan Award for Young Scientists, Division of Organic Chemistry Prize, and each award on The Pharmaceutical Society Japan Branches. The English lecture by the candidate allows any overlaps with the one in the Symposium on Progress in Organic Reactions and Syntheses. This award is aimed at lectures that focus on the latest achievements, not review lectures. Multiple applications from one candidate can be accepted, if the application contents are different from the past presentations. Co-authors can be included just the same as other lectures.
